

WARSHIP OUT OF SERVICE

UNLUCKY ON CRUISES, SUNK AT SANTIAGO, OF COMMISSION.

WATSON, D. C., December 6.—Active service of fourteen second-class battleship Texas, which was the first armor-clad ship of the new United States navy, had an eventful, if brief, career.

Placed on the retired list, she came from the Charleston navy yard to the Jamestown, where she has been for the past few months. When her service as a target ship was over, she was towed over to the Norfolk harbor.

In 1897 she again went ashore, this time at the Tortugas; in December of the same year she repeated in the Wallabout canal. Five years passed without serious mishap. Then in November, 1902, while at target practice, her big guns broke loose and wrecked the surrounding works. Last year a bill was introduced into congress to test the effects of a shell containing a large quantity of explosive gelatine, using the Texas as a target.

This was not done, however, and now she is spending her last days in the waters in which she was christened and from which she started on her career. The Texas cost \$2,500,000 to build and over \$1,500,000 for repairs.

America Alone Has Hummingbirds.
Though the art museums of Europe may have some treasures of which America cannot boast, our continent has the distinction of a monopoly of the world's supply of hummingbirds, the gems of all the feathered creation. Of these there are said to be some four hundred species—the four hundred we may well call them—nearly all of which are peculiar to the tropical regions. Only eighteen cross the borders of the United States from Mexico, and occur only in our southwestern states.

The popular idea is that the hummer lives only on honey, gathered from flowers. This is a mistake. The bird does secure some honey, but its food consists mainly of the small insects which frequent the flowers. Some of these insects are injurious to the blossom, and the tiny bird fulfills a useful function in destroying them. That the hummer is insectivorous is also shown by its habit of catching tiny insects on the wing, which is occasionally observed.

Reflections of a Bachelor.
A very good way for a girl to make men admire her figure is to inherit a lot of money.
When a man's health is not good it can scare him out of doing most anything unless it is bad for him.
One of the surest ways to flatter a woman is to tell her you never liked to go to church till you knew her.
A man with a bad reputation has a lot of pleasure out of it because he knows how other men envy him the way he got it.—New York Press.

PAID AFTER 10 YEARS
Man Robbed of Postage Stamps Gets the Whole Lot Back.
DELAWARE, Ohio, December 6.—After ten years Professor L. L. Hudson of the Ohio Wesleyan school of business has been reimbursed for the loss of a large quantity of stamps through the dishonesty of an employee of the local postoffice.

Robert McCleary, the mailing clerk, who had detached the stamps from catalogues, was convicted. The stamps, held as evidence, were stored in the federal building in Columbus.
While the attic of the building was being cleared out the stamps were found and returned to the purchaser.

DEPUTY SHERIFF SERVES 100 SUBPOENAS IN DAY
Joe Sepulveda Establishes Record in Distributing Emergency Summons.
LOS ANGELES, December 6.—Joe Sepulveda, deputy sheriff under Sheriff W. A. Hammel, has established a record for serving subpoenas, having distributed 100 of them Tuesday between 8 o'clock in the morning and 9 o'clock that night. The subpoenas were issued in connection with cases to come before the juvenile court yesterday and it was necessary that they be served the day before. In the work the officer drove a single rig and changed horses but once.

His Contribution.
Stories have been told of buttons, tacks and various extraneous substances found in contribution boxes, but it is seldom that a church member strikes a blow so severe as was that delivered by Amos Budd of Potterville on one occasion.
It was at the close of a missionary sermon that Mr. Budd, whose wont it was to contribute ten cents to each of the charities to the support of which the church subscribed, was seen to take a blue slip from his pocket and look at it keenly and affectionately.
When, after a slight but evident hesitation, he dropped the slip carefully folded into the box, Deacon Lane, who was passing the box could hardly refrain from an exclamation of joy.
"The Lord will bless you Brother Budd," he said when the sermon was over, hurrying down the aisle to overtake the prosperous grocer.
"I hope so," retorted Mr. Budd, dryly, "but I'm afraid you call late on that being a check that I dropped in the box. It wasn't. 'Twas a receipted bill for kerosene the church owed me last year, and it had been overlooked. Of course it's just the same as money though, when you come to that."

A Queer Direction.
Yes, there was no doubt about it, Mr. Hunter had lost the "field." He had searched for the other fox-hunters long but vainly, and he was now reduced to seeking aid of a chubbly little lad of three, whom he had met in the lane.
"Hallo, Johnny, which way did the hounds go?" he queried.
Johnny dropped his gaze and appeared too frightened to answer.
"Come," coaxed Mr. Hunter, "don't be afraid; here's a penny for you. Now tell me, which way did the hounds go?"
The youngster took the coin, and then fell upon all fours and imitating the barking of dogs—
"Dat way," he said shyly.

It is of special significance to recall that after the panic of 1857 the recovery was rapid and was aided by abundant crops.
In the United States today there are abundant crops. There are gigantic business enterprises on a solid basis and furnishing employment to millions. The resources of the forty-six states are being developed in every direction, and there is not a long list of failures to daunt and dishearten anyone connected with financial or mercantile affairs.—Boston Globe.
